

Double D Mats **Handy Measurement Guide**

Thank you for choosing Double D Mats. Here are some general guidelines for measuring your facility for our rubber matting.

Measure all areas that need to be covered by your mat:

1. Start at a center point or a square corner.
2. Measure the width and length of the space.
3. For a curved space, identify how much of a curve there is by measuring from end to end the length, and then from the center to the top of the curve.
4. To determine the length of a tub that is a quarter or half circle measure the size of the gate.

* These are standard recommendations, but there could still be more measurements needed depending on the shape of the tub or area. Please contact us at **1-888-377-2879** or **info@doubledmats.com** if you need assistance.

Tips:

- Some facilities lay down black plastic and cut it to the size of the space as a pattern and then mail it to us.
- Each mat is different and it is very important to get the right measurements to fit the area because you can't just cut the mat to fit. If you have any questions you are more than welcome to call us at **1-888-377-2879** or email us at **info@doubledmats.com**.
- We also conduct on-site measurement visits. The charges are \$300 for visits within a 350 mile radius of our facility and \$.50 per mile both ways for any mileage after that.
- We also carry a number of standard sized mats. You can view the available sizes on our website, which are usually available for immediate shipment.

Submitting measurements:

Once you have measured and drawn the space fax the measurements to us at **785-673-4331** or email it to **info@doubledmats.com**.
